ADDITIONAL COMMENTS

1. On site to conduct comprehensive site inspection. The required signage appeared adequate and access roads were maintained.
2. The disposal area boundaries were clearly marked and appeared adequate based on permit conditions. All visible septage discharges appeared to be within permitted boundaries.
3. The application of septage appeared to have been in accordance with permit conditions and application rates with the exception of evidence that heavy application was noted on the south portion of Field #2 where it borders on Field #3. Waste appeared to have been thickly applied in this region – please review application methods (dilution of grease septage 1:1, applications rates, repair requirements). The majority of the cropstand appeared stable and no ruts greater than 3-inches were noted at the time of the inspection.

07/19/12

4. Please refer to Chester Cobb or Connie Wyle (chester.cobb@ncdenr.gov or connie.wylie@ncdenr.gov) for technical assistance. As Anthony Foster is no longer the ESS assigned to your facility/county, please contact Bill Wagner (bill.wagner@ncdenr.gov 828-296-4705) out of the Asheville Regional Office for any septage or land application questions or concerns.

Please contact me if you have any questions or concerns regarding this inspection report.
